

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-6. (canceled)

7. (currently amended) A method of providing electronic mail notification to a calling communications device, comprising:

associating an email with a first phone number;

receiving a call from [[a]] said calling communications device; and

using call related information from said call to automatically identify and provide said email to said calling communications device after said calling communications device calls a first phone number and without answering said call to said first phone number from said calling communications device.

8. (currently amended) The method of providing electronic mail notification to a calling communications device according to claim 7, further comprising:

obtaining a communications device identifier when said calling communications device dials said first phone number; and

using said communications device identifier to select said electronic mail message.

9-25. (canceled)

26. (currently amended) A method of retrieving information by a first device from a second device, comprising:

receiving a call from a first device associated with a first telephone number at a second device associated with a second telephone number;

associating user specific pre-designated information with call related information relating to said first device;

using said call related information to automatically retrieve said user specific pre-designated ~~desired~~ information in response to said call from said first device without a need to answer said call from said first device; and

transmitting said retrieved user specific pre-designated desired information to said first device.

27. (currently amended) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

transmitting said retrieved ~~desired~~ user specific pre-designated information in a short message to said first device.

28. (previously presented) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

determining said first telephone number from said call related information associated with said call to said second telephone number by said first device.

29. (previously presented) The system for allowing a first device to retrieve information from a second device according to claim 26, wherein:

said call related information is caller ID.

30. (currently amended) A system for retrieving information by a first device from a second device, comprising:

means for receiving a call from a first device associated with a first telephone number at a second device associated with a second telephone number;

means for associating user specific pre-designated information with call related information relating to said first device;

means for using said call related information to automatically retrieve said user specific pre-designated ~~desired~~ information in response to said call from said first device without a need to answer said call from said first device; and

means for transmitting said retrieved user specific pre-designated desired information to said first device.

31. (currently amended) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for transmitting said retrieved user specific pre-designated desired information in a short message to said first device.

32. (previously presented) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for determining said first telephone number from call related information associated with said call to said second telephone number by said first device.

33. (previously presented) The system for allowing a first device to retrieve information from a second device according to claim 30, wherein:

said call related information is caller ID.
